	The efforts taken to rehabilitate the land for which the provisions contained in decision 2/CMP.7, annex, paragraph 33, are applied	✓	In chapter 9.4.4 of the NIR, the Party reports that no land was subject to exclusion due to natural disturbance in years 2013, 2014, 2015 and 2016.
	That emissions associated with salvage logging were not excluded from the accounting	✓	In chapter 9.4.4 of the NIR, the Party reports that no land was subject to exclusion due to natural disturbance in years 2013, 2014, 2015 and 2016.
If not accounted for by instantaneous oxidation, information on GHG emissions/removals resulting from changes in the HWP pool accounted for in accordance with decision 2/CMP.7, including:			
	Activity data for the HWP categories used for estimating the pool removed from domestic forests, for domestic consumption and for export	✓	
	Half-lives used in estimating emissions/removals for the HWP categories used	✓	
	Whether emissions from HWP originating from forests prior to the start of the second commitment period have been included in the accounting, if the forest management reference level is based on a projection	✓	
	How emissions from the HWP pool accounted for in the first commitment period on the basis of instantaneous oxidation have been excluded from the accounting for the second commitment period	✓	The Party clarified that the emissions from the HWP pool accounted for in the first commitment period on the basis of instantaneous oxidation have been not excluded from the accounting for the second commitment period.
	How HWP resulting from deforestation has been accounted on the basis of instantaneous oxidation	✓	
	How CO_2 emissions from HWP in solid waste disposal sites and from wood harvested for energy purposes have been accounted on the basis of instantaneous oxidation	✓	
	How emissions/removals from changes in the HWP pool accounted for do not include imported HWP	✓	The Party clarified that the emissions and removals from changes in the HWP pool accounted for do not include imported harvested wood products, consistently with the HWP reporting under the Convention.

	Technical corrections made pursuant to decision 2/CMP.7, annex, paragraph 14		✓	
	Forest management: if emissions/removals from the harvest and conversion of forest plantations to non-forest land were included, information on how requirements set out in decision 2/CMP.7, annex, paragraphs 37–39 were met, including:

PART IV Provision of information relating to KP-LULUCF activities under Article 3, paragraphs 3 and 4, of the Kyoto Protocol (continued)					
				Provided	*Observation*
			A demonstration that the forest plantation was first established through direct human-induced planting and/or seeding of non-forest land before 1 January 1990, and, if the forest plantation was re-established, that this last occurred on forest land through direct human-induced planting and/or seeding after 1 January 1960	✓	The Party clarified that it does not apply the provision of carbon equivalent forests in the accounting of forest management.
			A demonstration that a new forest of at least equivalent area to the harvested forest plantation is established through direct human-induced planting and/or seeding of non-forested land that did not contain forest on 31 December 1989	✓	The Party clarified that it does not apply the provision of carbon equivalent forests in the accounting of forest management.
			A demonstration that this newly established forest will reach at least the equivalent carbon stock that was contained in the harvested forest plantation at the time of harvest, within the normal harvesting cycle of the harvested forest plantation, and, if not, a debit would be generated under Article 3, paragraph 4	✓	The Party clarified that it does not apply the provision of carbon equivalent forests in the accounting of forest management.
